

Procedure:-

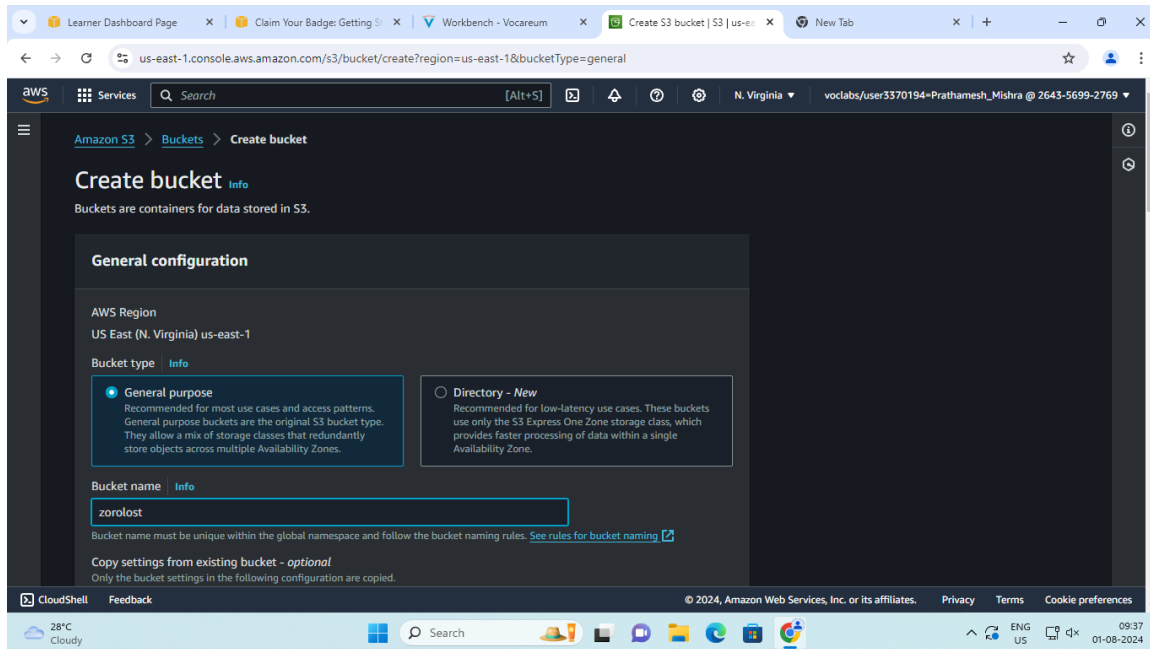

1. Go to AWS Console, in "Storage" click on S3

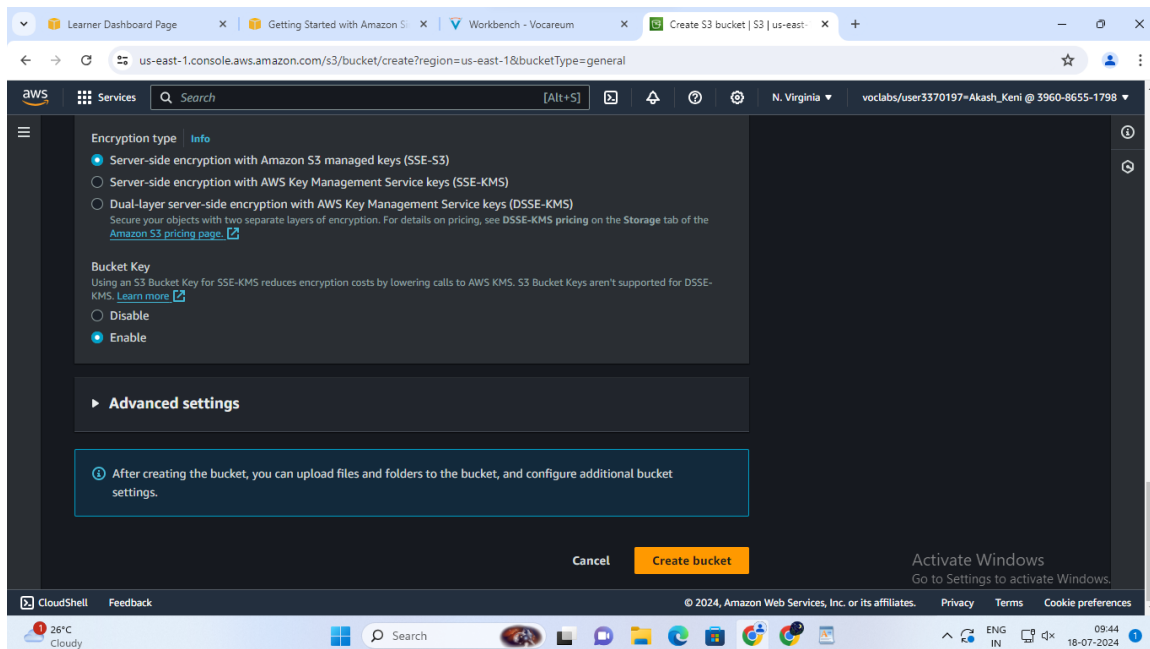

2. You will see the "Create bucket" option, click on it

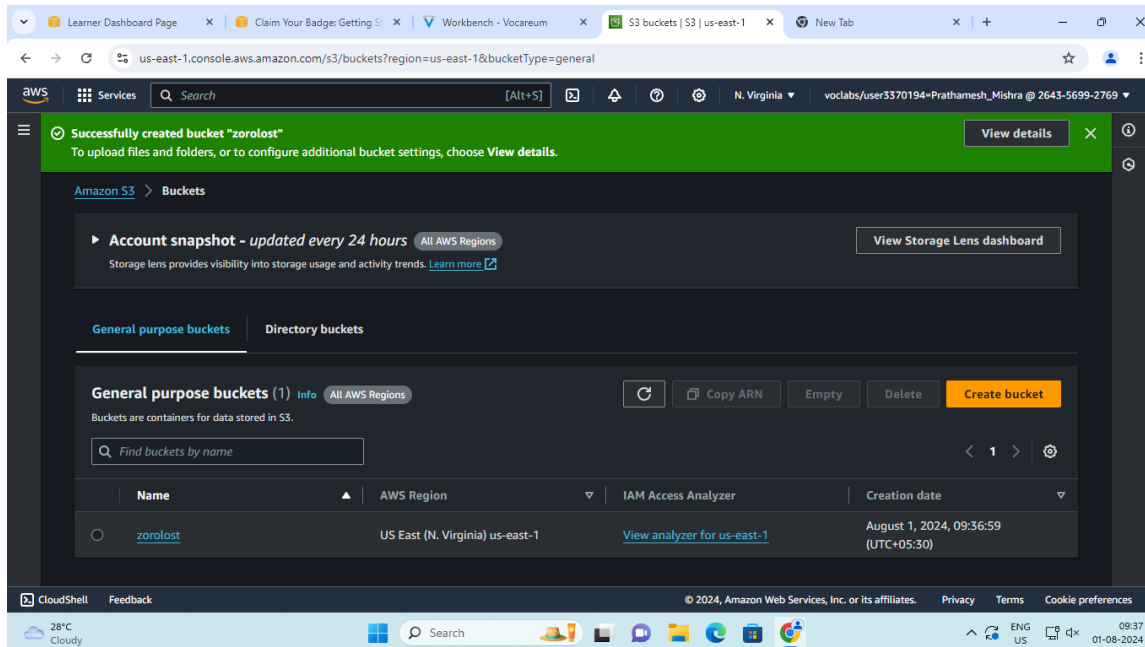

3. Give the name to your Bucket and select Bucket type

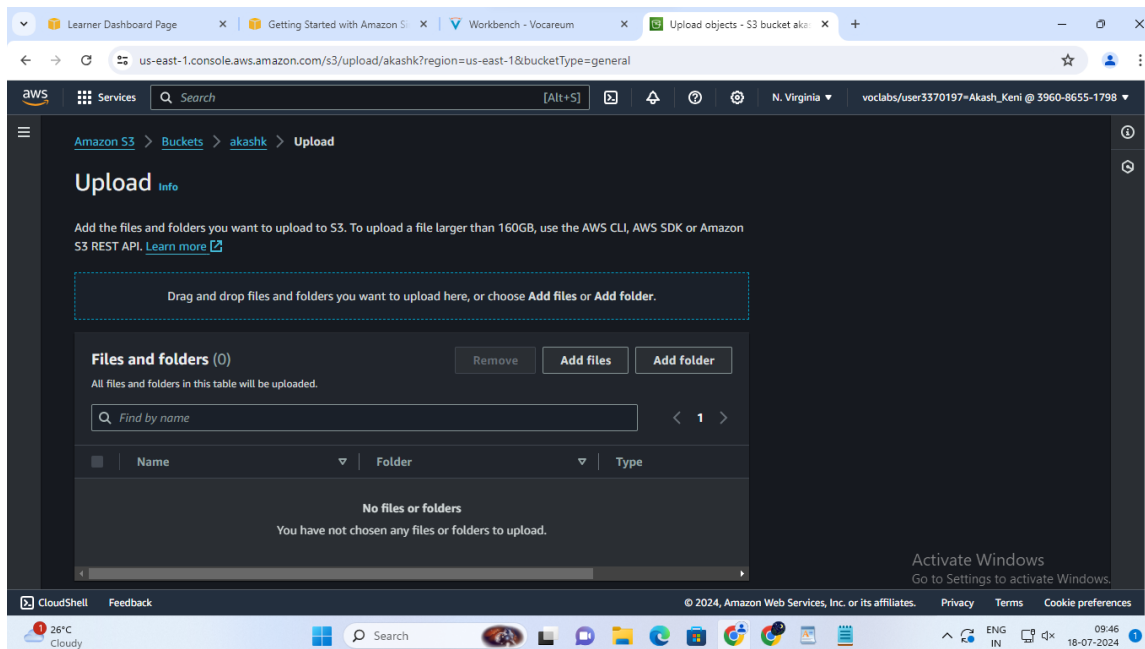

4. Now click on “Create Bucket” to create the bucket

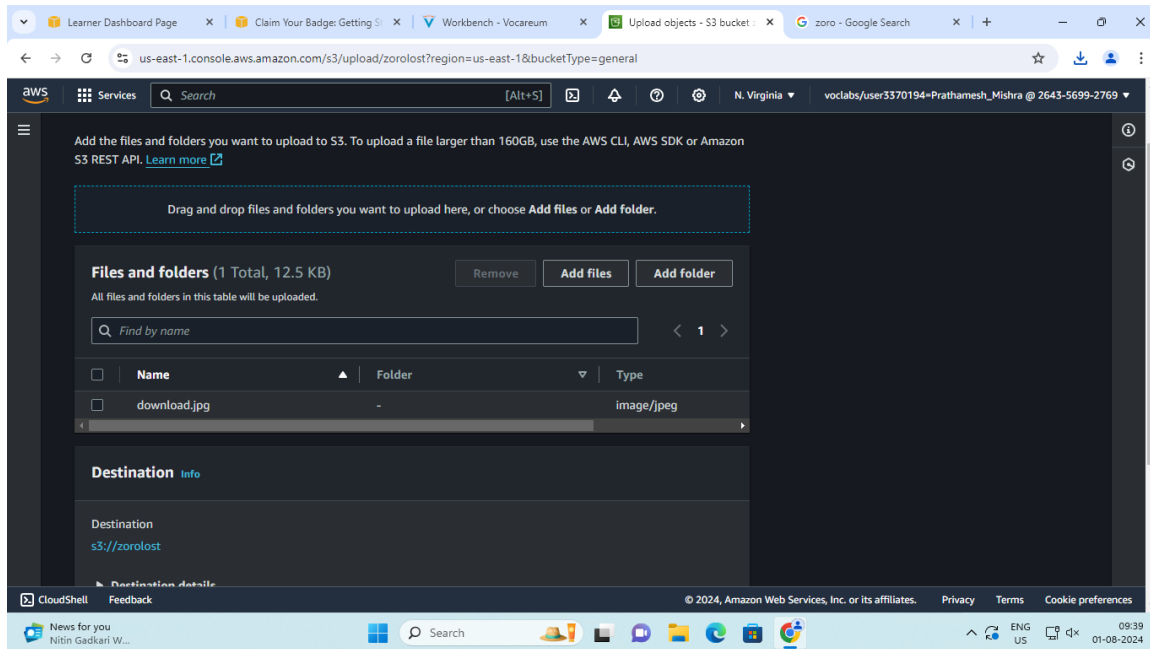

5. Now the Bucket has been created , click on the bucket to upload the files

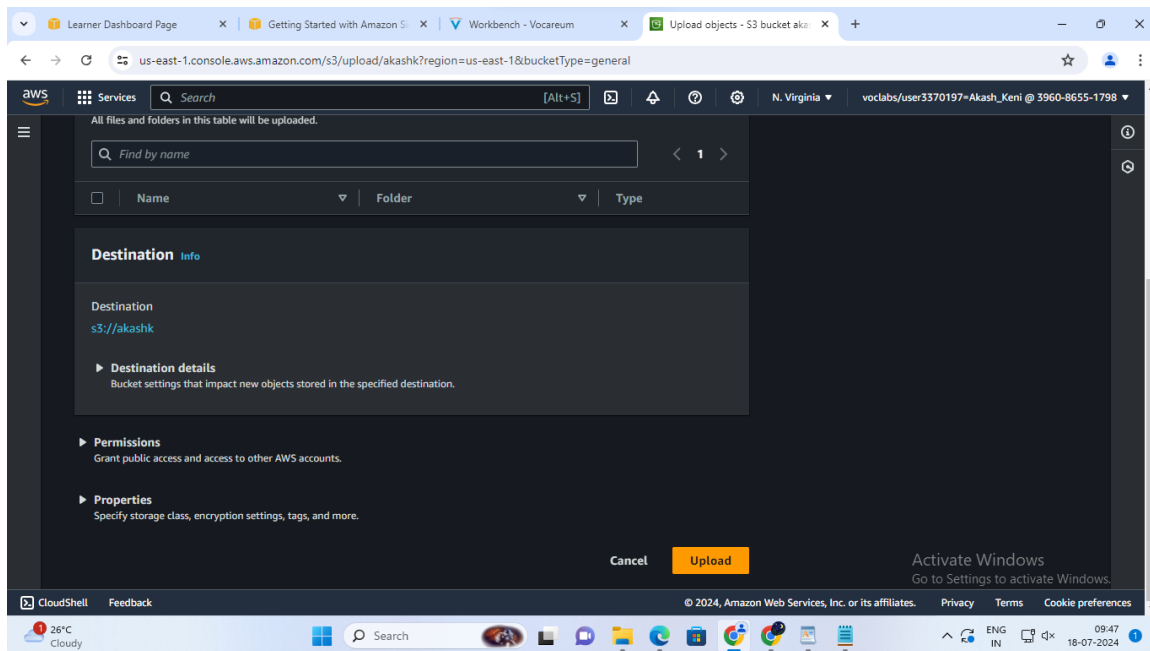

6. Now add the files of folders you need to upload in the bucket

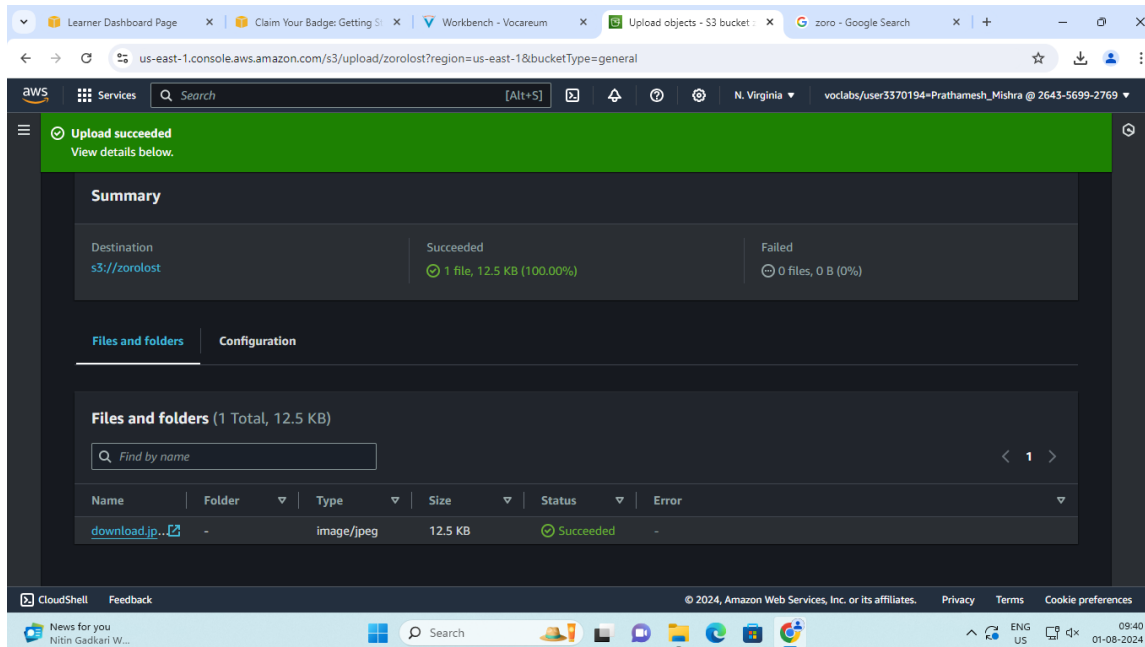

7. Selected file/folder will appear there

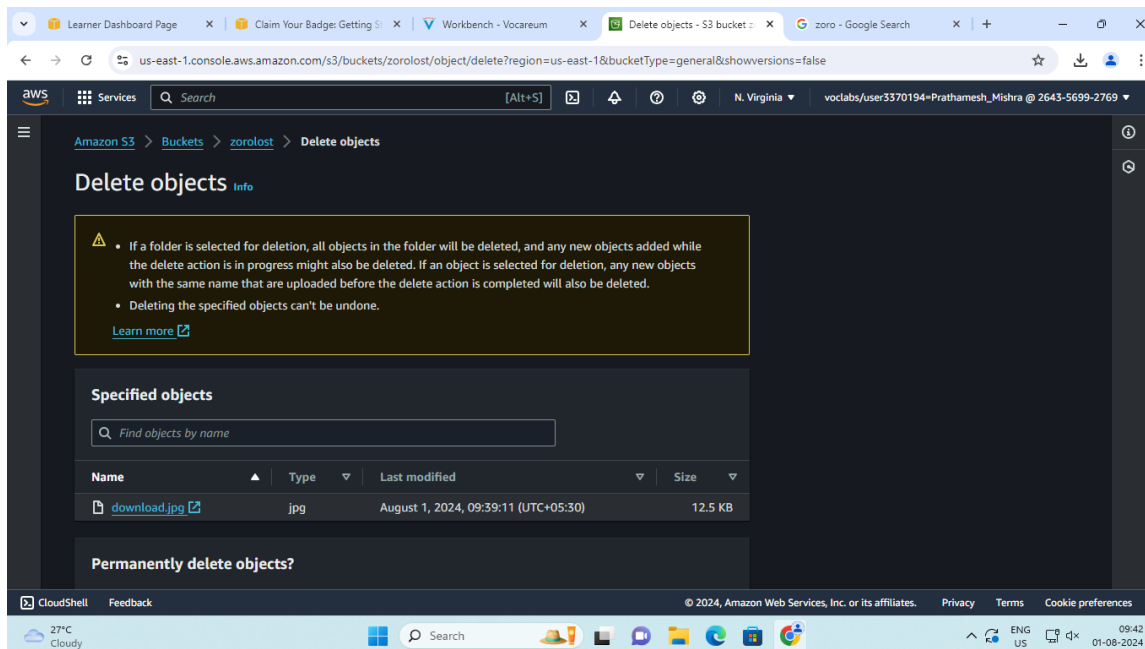

8. Click on “Upload” to upload the file/folder

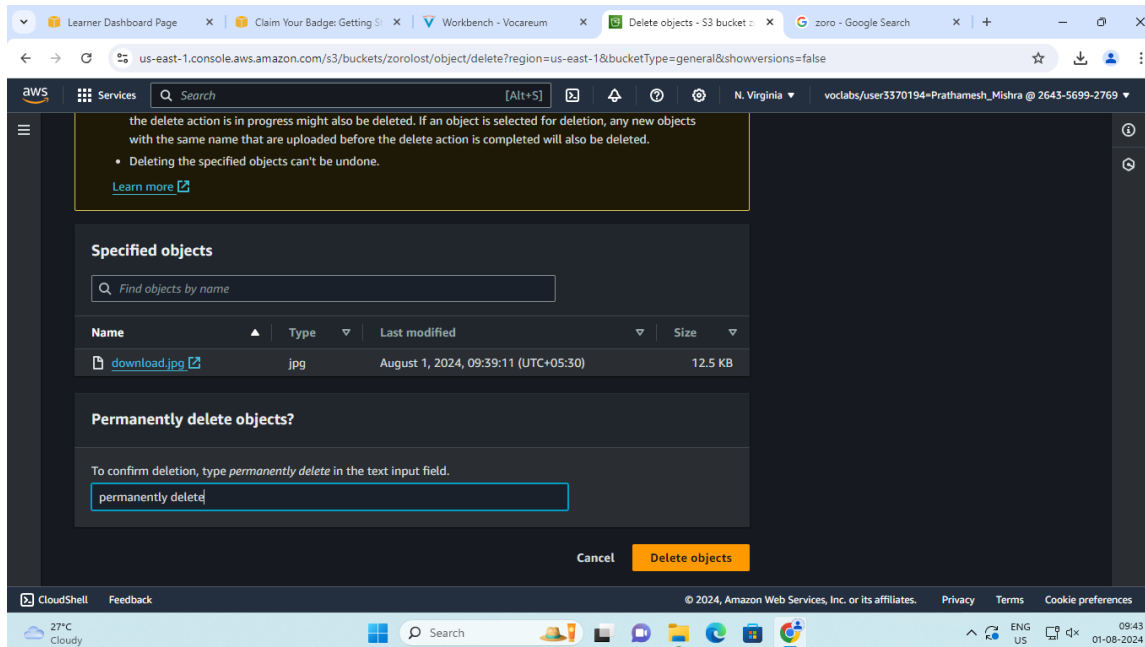

9. Now the file will be uploaded successfully

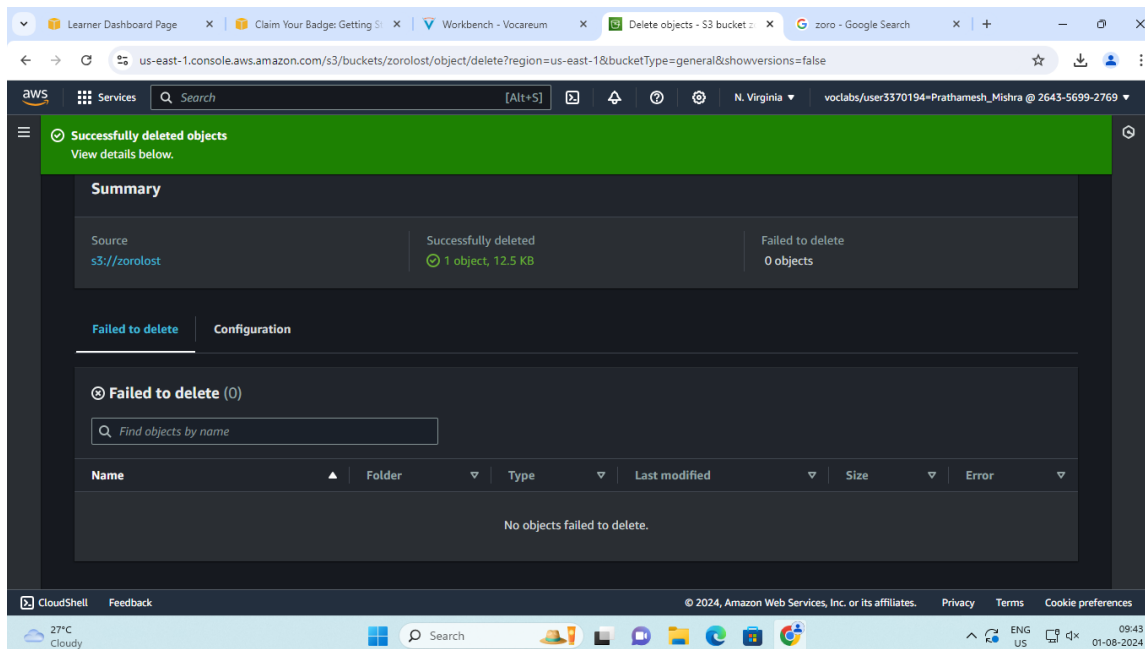

10. Click on the file to delete it

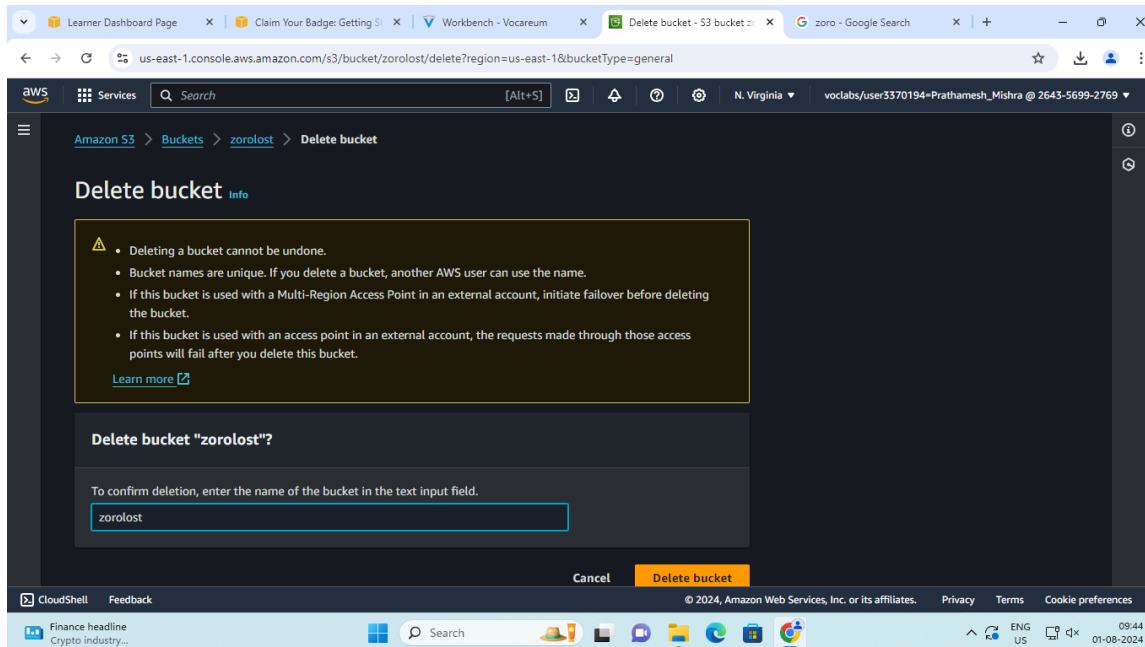

11. Click on the "Delete objects" to delete the selected file (object)

12.The file now has been successfully deleted

13.Select on the Delete Bucket option, confirm the bucket name and click on “Delete bucket”

14. Now the bucket has been successfully deleted
